

# Instructions

## AirCheckup™ 24 Hour Air Particle Test

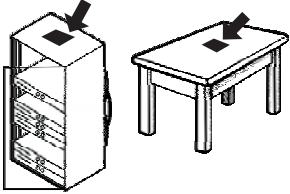

### Including comprehensive lab report

This test kit is designed to test indoor air cleanliness in offices, workplace, hospitals, health care, manufacturing, public buildings, data centers, residential and more.

Kit contents: 1 sampler in cleanroom grade resealable bag, instructions, post paid return mail for returning sampler for laboratory processing.

For more information please visit [www.aircheckup.com](http://www.aircheckup.com)

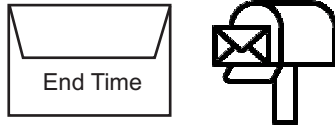

- 1** Remove sampler from the sampler bag and place on a clean flat surface where it will not be disturbed.

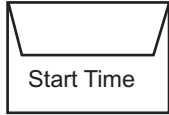

- 3** After 24 - 48 hours, seal sampler in the sampler bag.

- 4** Note the "Test End Time" and other information on the back of the return mailer and send to our lab. WE PAY WORLDWIDE POSTAGE.

- 2** Note the "Test Start Time" on the back of the return mailer.

The lab report will be sent by email.  
Please allow up to 10 working days for us to receive and process your sampler.
