

ThermPrintTM provides a "thermal fingerprint" of your entire data center empowering you to make informed decisions effecting energy efficiency, productivity and uptime.

How ThermPrintTM works:

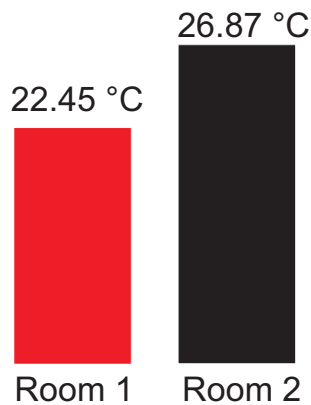

Step 1:

Our technician visits your data center to take high resolution infrared images of rack inlets.

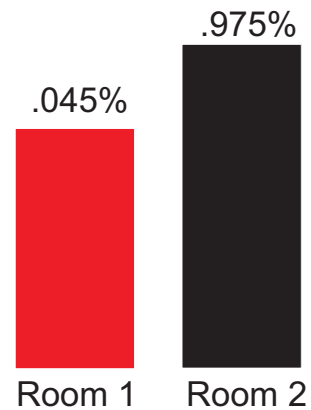

Step 2:

Using proprietary software, millions of temperature measurements are processed into the most comprehensive data center thermal report available today!

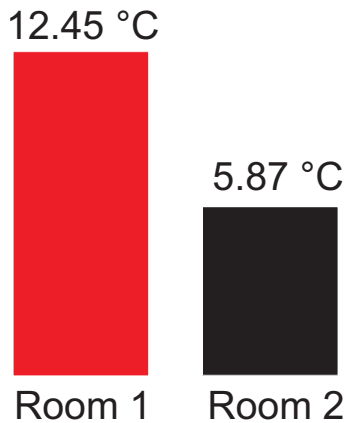

Average Temperature at Rack Inlets:

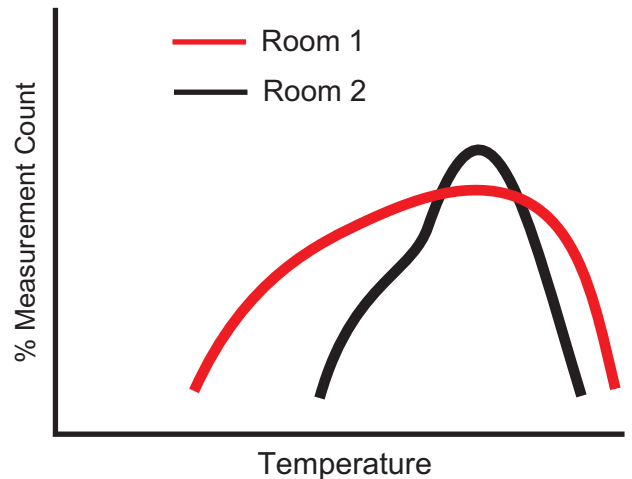

Hot Spots: % of Rack Inlet Area > °30:

Temperature Spread at Rack Inlets:

Temperature Distribution at Rack Inlets:
